TOWNSHIP 14 NORTH, RANGE 20 EAST, MDM, NEVADA

CHAINS

GENERAL DESCRIPTION

The land resurveyed and surveyed within T. 14 N., R. 20 E. is nearly level to rolling hills in the western part and varies in elevation from about 4,640 to 4,880 feet above sea level. The soil is sandy to rocky and sandy clay loam. The vegetation consists of willows along Carson River and Clear Creek and sagebrush, rabbitbrush and native grass in the undeveloped lands. Carson River drains this area and Clear Creek is a tributary to Carson River. U.S. Highway No. 395 enters the township proceeding in a northerly direction through the center of section 19, changing to a north-northeasterly direction in section 18, exiting the township in the east half of section 6. Access is provided by numerous roads (paved and dirt) off of U.S. Highway No. 395.

The use of the land varies from residential in the higher elevations to pastures for grazing along the Carson River.

No mineral formations of any consequence were noted during the course of the survey.
