Subs. T. 38 N. R. 56 E.

General Description.

The land embraced in this township is nearly all mountainous.

The extreme northern and Northwestern part is high rolling ground with some agricultural land in the valleys between the ridges, but not much.

The lack of water during the Irrigating Season and no chances to store the water flowing to waste in the Spring renders the chance for Settlers very limited.

Small ranches could be taken up on Secs. 2. 5 & 7 but the water supply is very limited in quantity.

The remainder of the township is only good for grazing ~~and~~
