	Land very rough and mountainous.
	Soil rocks and boulders.
	No timber desert brush.
	Mountainous land 80.02 chs.

December 9, 1911.

Subdivisions of T.16 N., R.22 E.

Owing to the lateness of the season and the imminence of a heavy snow fall, in beginning the subdivision of this township, I deemed it advisable, and in the best interest of the public service, to first, complete the survey of those sections lying on the high, precipitous, slide rock mountains, where a heavy snow fall would render impossible the survey of these sections until another season; whereas those sections lying on the flat to the west, where the snow fall would be much less, could easily be surveyed, even after a severe snow storm. When I began the survey, snow was falling, and when the survey was completed, the fall of snow on the
