Soil, very fertile silt bottom, 1st rate. Timber, medium cottonwoods. Undergrowth, dense willows, arrow-weed, and salt grass. Grazing, poor.</p>
--------	---

GENERAL DESCRIPTION.

This fractional township is contiguous to and west of right bank of the Colorado River, and lies between the Fort Mohave Indian Reservation Boundary on the north, and the California-Nevada State Boundary Line on the south. Its southerly point formed by the right bank of the river and the state boundary line, is the southmost extremity of the state of Nevada. The land is entire level bottom land and the soil a very fertile alluvial silt. A medium to scattering stand of cottonwoods is found
