

Independent Resurvey, Subdivisional Lines, T. 25 S., R. 64 E.

Chains

The point for the N. $\frac{1}{4}$ sec. cor. of sec. 5 is at midpoint and on the N. bdy. of the Tp.

At the cor. point.

Set an iron post, 30 ins. long, $2\frac{1}{2}$ ins. diam., 24 ins. in the ground, with brass cap mkd.

T24S R64E
 $\frac{1}{4}$ S 5
T25S R64E
1959

Deposit broken glass around the iron post, 6 ins. below the surface of the ground, and raise a mound of stone 3 ft. base, $1\frac{1}{2}$ ft. high, S. of cor.

From this cor., the standard $\frac{1}{4}$ sec. cor. of sec. 32, T. 24 S., R. 64 E. (Sixth Standard Parallel South), which is marked with an iron post, 1 in. diam., firmly set in the ground, and in a mound of stone, mkd. and witnessed as defined in the record of the 1931 independent resurvey of the Sixth Standard Parallel South, through R. 64 E., bears W., 66 lks. dist.

The point for the N. $\frac{1}{4}$ sec. cor. of sec. 6 is 40.00 chs. W. of the closing cor. of secs. 5 and 6, T. 25 S., R. 64 E., and on the N. bdy. of the Tp.

At the cor. point.

Set an iron post, 30 ins. long, $2\frac{1}{2}$ ins. diam., 24 ins. in the ground, with brass cap mkd.

T24S R64E
 $\frac{1}{4}$ S 6
T25S R64E
1959

Deposit broken glass around the iron post, 6 ins. below the surface of the ground, and raise a mound of stone, 3 ft. base, $1\frac{1}{2}$ ft. high, S. of cor.

From this cor., the standard $\frac{1}{4}$ sec. cor. of sec. 31, T. 24 S., R. 64 E. (Sixth Standard Parallel South), which is mkd. with an iron post, 1 in. diam., firmly set in the ground, mkd. and witnessed as defined in the record of the Independent Resurvey of the Sixth Standard Parallel South, through R. 64 E., bears W., 66 lks. dist.

General Description

The landforms of Township 25 South, Range 64 East are those generally associated with range and basin type topography. The land of secs. 3, 4, 5, 6, 7, 8, 9 and 10 is an alluvial fan, with a slight north slope, while the remainder of the township is broken mountainous terrain. The Eldorado Mountains, being of fault block origin and deeply eroded, enter the township in the vicinity of the northeast corner of the township and bear southwest to terminate near the south boundary of sec. 34. The elevation of the township ranges from 1880 feet above sea level, in the bottom of Lonesome Wash near the corner of secs. 13 and 24 on the east boundary, to 3576 feet above sea level on a peak in the south central portion of sec. 22.

The soil is principally a shallow, rocky, sandy silt, with large areas of exposed bedrock, which supports a vegetative cover composed of catclaw acacia, creosote bush and several species of cacti, the type, number and size varying with moisture and topography.
