

## WGBCC Interagency Situation Report

### Preparedness Level 1 as of 10/20/04 at 1630 hrs.

This is the final WGBCC report of the 2004 season.

**Current Situation:** Initial attack activity was minimal during the week (10/15 to 10/20), with 5 new fires reported for a total of 223 acres. Weather conditions changed markedly, with much cooler temperatures and significant rain and snow statewide over the past few days essentially constituting a season ending event.

**Outlook:** Showers and wintry conditions will continue as a cold low pressure system moves east before exiting the area on Thursday. A weaker system will bring a chance of rain and snow again this weekend, while another major storm system will move into the area early next week.
