

2.

Humboldt NATIONAL FOREST

STATE OF Nevada.

Chains

From these observations I calculate the bearing of a sharp point of rocks, 10 miles dist., as (1) N. $46^{\circ} 01' 46''$ E., and (2) N. $46^{\circ} 02' 28''$ E. The mean of these is N. $46^{\circ} 02' 07''$ E., and to the corresponding meridian all courses of this survey are referred.

Mean Mag. Declin. = $19^{\circ} 20'$ E.

BEGINNING AT COR. 1, identical with Cor. H-1 of the listing survey and the established Forest Service Monument, which is a lava boulder in place 10 x 6 x 6 ft. above ground, mkd. and witnessed as described by the Sur. Gen. I deface the markings on this boulder for the listing survey and the Forest Service Monument, and remark it, 1-HES-106 on side facing the claim, and a cross (+) on top, and raise a mound of stone, 4 ft. base, 2 ft. high, alongside the above described boulder, within the claim.

A portion of a granite outcrop, 4 x 2 ft. x 12 ins. above ground, mkd. +-1-HES-106-BR, bears S. $36^{\circ} 53'$ E., 118 lks. dist.

A granite boulder in place, 10 x 10 x 8 ft., mkd. +-1-HES-106-BR, bears S. $51^{\circ} 44'$ W., 24 lks. dist.

Mile Post No. 96 on the Idaho-Nevada State line, which is a granite stone, firmly set, mkd. and witnessed as described by the Sur. Gen., being in sight, bears N. $17^{\circ} 17'$ E., 33.86 chs. dist.

I destroy the witness to the listing cor. and the Forest Service Monument.

Thence

S. $14^{\circ} 10'$ W.,
