Chains

Observation 2.

3 h. 36 m., P. M., apparent time.

Observed altitude = 41° 56'

Horizontal angle (reference to right to sun) =

283° 54' 30"

From these observations I calculate the bearing of a reference object 1 mile distant from my station as (1) N. 19° 13' 13" W. and (2) N. 19° 13' 16" W.

The mean of these two observations is N. 19° 13' 14" W., and to the corresponding meridian all courses of this survey are referred.

Mean Magnetic Declination = 18° 45' E.

BEGINNING AT COR. NO. 1 of this survey, identical with Cor. No. 5 of the listing survey, which is a granite stone, firmly set, mkd. and witnessed as described by the Surveyor General, in place of which I set a granite stone, 26 x 8 x 8 ins., 16 ins. in the ground, over broken glass, for Cor. No. 1 of this survey, mkd. 1-HES-133 on the side facing the claim, and a cross (x) on the top.

No suitable bearing objects available, therefore, dig pits, 24 x 24 x 12 ins., crosswise on line S. 16° 49' E., and S. 48° 48' W., 7 ft. dist., and raise a mound of stone, 4 ft. base, 2 ft. high, 3 1/2 ft. dist., within the claim.

I destroy the witness to the listing corner.

Cor. No. 1 of H. E. S. No. 64 (accepted), which is an

aspen post, firmly set, showing 12 ins. above ground, properly mkd., and witnessed by pits and by a mound
