Observation 2.

June 9, 1920,

At 3 h. 15 m., P. M., apparent time.

Observed vertical angle = 45° 38'.

Horizontal Angle (from reference to right to sun) =

34° 24' 30".

From these observations I calculate the bearing of a reference stake, firmly set, centered with a tack, 5.00 chs. dist., from my station, as (1) S. 46° 00' 58" W., and (2) S. 45° 59' 55" W.

The mean of these two observations is S. 46° 00' 27" W., and to the corresponding meridian all courses of this survey are referred.

Mean Magnetic Declination = 19° E.
