

REPORT.

The Cor. common to Secs. 31 and 32 T. 44 N., R. 52 E. and Secs. 5 and 6 T. 43 N., R. 52 E. is a mound of rock with no marked stone or post. This corner was identified by retracing the lines North, South, East and West. The distances and alignment agree with notes on file in the U.S. Surveyor General's Office. A juniper tree 16 ins. in diameter bears S. 53 W. 23 ft., which I blazed and scribed E.T.S. 6, 43-52.

Cor. No. 3 Golden Rule Lode (unsurveyed) is a pine post 4 ins. square, set in a mound of rock scribed 4-Golden Rule.

The N.E. Corner Snowstorm Lode (unsurveyed) is a juniper tree blazed and scribed N.E. Cor. Snowstorm.

This survey was tied to the N.W. Cor. of Sec. 5, T. 43 N., R. 52 E. because it was the nearest corner of the public survey that could be identified.
