### Instrument.

This survey was made with  
 an Ainsworth & Son's transit.  
 The courses were deflected from  
 the true meridian as determined  
 by direct solar observations.  
 The distances were measured  
 with 75 ft and 12 ft steel tapes.

### Report

1. The lines of this survey were determined from lines run direct upon the ground.
2. The Int. Cor. Sec. 29, T. 31 N., R. 34 E of the Int. Diablo Meridian is a stone line thick 8 ins wide x 12 ins
