

Survey No. 3647 A and B.

OTHER IMPROVEMENTS.

A shaft,---the center of which bears N. 3° 19' 50" W., 141.70 ft., from Cor. No. 2, Good Hope No. 3 lode,---4 ft. x 5 ft., 20 ft. deep, in earth.

Claimants unknown.

The upper 114 ft. of shaft No. 8 and drift at bottom of 114 ft. extending S. 54° 20' E., 50 ft., with a shaft 20 ft. deep at end of drift.

Claimants unknown.

INSTRUMENT.

This survey was made with a Gurley Solar Transit. The courses were deflected from the true meridian as determined by direct solar observations. The distances were measured with 50 ft. and 500 ft. steel tapes.

REPORT.

The N. E. Cor. Section 27, T. 34 N., R. 51 E., M. D. B. & M., to which connection is given, is a willow post 3 inches square, set in mound of stone and extending 14 inches above it, marked with 2 notches on the East and 2 notches on the South.

The S. E. Cor. Section 34, T. 34 N., R. 51 E., M. D. B. & M., to which connection is given, is a black limestone rock, 6" x 8", extending 4 inches above a mound of stone, marked 2 notches on the East and 4 notches on the West.

The E. 1/4 Cor. Section 26, T. 34 N., R. 51 E., M. D. B. & M., to which connection is given, is a willow post 3 inches square, set in a mound of earth and stone and extending 18 inches above it, marked 1/4 S. Pits E. and W., nearly obliterated.

All lines of this survey were run directly upon the ground, or else calculated from carefully run traverses.

Note I.---My reason for acting as a notary public in taking the oaths of assistants is: The nearest officer qualified to administer such oaths was many miles away and could not be reached without much delay and expense.

Note II.---The discrepancies between these field notes and the amended location certificates are due to errors in the latter.
