

## SURVEY No.3875.

clines  $25^{\circ}$  S. $39^{\circ}45'$ E. 18 ft. to point "A", thence N. $82^{\circ}$  24'E. 25 ft. to bottom. Claimant.unknown.

A shaft the mouth of which bears from Cor. No. 2, Rubert lode, S. $79^{\circ}$ E. 125 ft. 4 x 6 x 10 ft. deep. Claimant unknown.

The lodes of this claim have been developed by the following common improvements and credits have been made to the lodes, which in my opinion have been economically and advantageously developed by said improvements;-

Inclined shaft No. 4 is a common improvement to the Lion and Rubert lodes, and  $\frac{1}{2}$  of its value is credited to each of these lodes.

Of the last 250 ft. of tunnel No. 8,  $\frac{1}{2}$  is credited to each of the Lion No. 1 and Rubert lodes.

Tunnel No. 5 is a common improvement to the Lion No. 1 Lion and Ajack lodes and  $\frac{1}{3}$  of the value is credited to each of these lodes.

-----  
INSTRUMENT.

This survey was made with a C. L. Berger & Sons, mining transit No. 6253. The courses were deflected from the true meridian as determined by direct solar observations. The distances were measured with a 500 ft. steel tape.

-----  
REPORT.

The lines of this survey and the tie lines were run upon the ground.

The N.  $\frac{1}{4}$  Cor. of Sec. 22, T.18 N., R.64 E., Mt. Diablo B. and M., is a limestone 8 x 8 ins. 6 ins, high, marked  $\frac{1}{4}$  on top. This is the nearest standing Corner of the public land survey that can be found and identified.

-----  
The S.  $\frac{1}{4}$  Cor. of Sec. 22, T.18 N., R.64 E., Mt. Diablo B. and M., is a limestone 10 x 11 ins. at the base, 14 ins. high and tapering to 4 ins. square at the top. Marked  $\frac{1}{4}$
