

INSTRUMENT.

This survey was made with a C.L.Berger mining transit, No.3246. The courses were deflected from the true meridian as determined by an observation on Polaris at Eastern Elongation. The distances were measured with 100-ft. and 660-ft. steel tapes.

REPORT.

The S.E.Cor.Sec.32, T.28 N., R.46 E., M.D.M. is a quartzite stone 6 X 8 ins. showing 14 ins. above the ground, marked with 4 notches on the east face and 2 notches on the west face, surrounded by a mound of stones. This is the nearest standing corner of the public survey that can be found and identified.

The Comet, Pawnee, Clipper and Fissure lodes: All corners are pine posts, properly set and scribed with number of the corner and name of location.
