

by means of offsets from the lode line.

The S. 1/4 Cor. of Sec. 8 T.37 N., R.23 E., M.D.B. & M. is a rhyolite rock, triangular shape, 6 ins. wide, 6 ins. out of ground, chiseled 1/4 on N. side.

The S.E. Cor. Sec. 8, T.37.N., R.23.E. M.D.B. & M. is a rhyolite rock 6 x 8 ins., 12 ins. out of ground, chiseled IIII on the north and east sides.

After diligent search, the E. 1/4 Cor. Sec. 17 T.37 N., R.23 E., M.D.B. & M. could not be found. The course and length of the line between the E. 1/4 Cor. and the N.E. Cor. of Sec. 17, was taken from the official township plat.

U.S.M.M. No. 208 is a porphyry stone 6 x 16 ins., 18 ins. above surface, set in mound of rock having a 6 ft. base and 1 1/2 ft. high. Chiseled U.S.L.M. 208. In the top of the stone is a drill hole in which is a willow plug and a nail.

The location monument of the Manzanita lode is a mound of rock 3.5 ft. high, 3.5 ft. base in which is a tin can containing the location notice.

The N. E. Cor. of the location is a 5 in. diameter aspen post showing 3 ft. above a mound of earth and stone, marked N. E. Cor. Manzanita.

The N. W. Cor. of the location is not now in existence. A year ago I had occasion to run the south line of survey No. 3178, Tonoqua lode, and at that time the corner was standing on said line a considerable distance to the west of where I have now located it.

The S. W. Cor. of the location is an aspen post 3 ins. in diameter 4 ft. above a mound of rock, marked S. W. Cor. Manzanita.

The S. E. Cor. of the location is an aspen post 3 ins. in diameter 4.5 ft high in mound of rock, marked S. E. Cor. Manzanita.
