

## Other Improvements, continued.

A corrugated iron transformer house, the N.W. Cor. of which bears from Cor. No. 4, Belcher No. 3 lode, N. 53° 32' E. 359.1 ft. 10x12 ft. Course of long side N. 64° 40' E. The Belcher Extension Divide Mining Company, claimant.

A frame gallows frame, the S.W. Cor. of which bears from Cor. No. 4, Belcher No. 3 lode, N. 32° 46' E. 270.4 ft. 20x24 ft. Course of long side N. 70° W. The Belcher Extension Divide Mining Company, claimant.

An electric power line which traverses the Belcher No. 1 lode and the Belcher No. 2 lode from a point on the easterly side line of the Belcher No. 1, S. 27° 51' 30" W. 906 ft. from Cor. No. 3 of said lode to a point on the northerly end line of the Belcher No. 2 lode, S. 63° 48' E. 337 ft. from Cor. No. 3 of said lode. Also a power line from said line to the transformer house on the Belcher No. 1 lode and another power line from first above mentioned power line to the transformer house on the Belcher No. 3 lode. The Nevada-California Power Company, claimant.

All other improvements are credited to the respective lodes upon which they are situated.

---

 INSTRUMENT.

This survey was made with an Ainsworth Theodolite Transit. The courses were deflected from true meridian as determined by direct solar observation, verified by polaris observation. The distances were measured with 650 ft. and 100 ft. steel tapes.

---

 REPORT.

The lode line of each location of this claim was run directly upon the ground and the several corners established by means of offsets from the lode lines. All tie lines were run directly upon the ground.

The N.W. Cor. Section 27, T. 2 N., R. 42 E., M. D. M., is marked by light gray to pinkish rhyolite stone, loosely set in a mound of stone and earth 2 ft. high by 4 ft. in diameter at the base.
