

Survey No. 4634.

Foot.

sible below this point of 20 ft. from the surface.

Instrument.

This survey was made with a C. L. Burgo and Sans transit No. 3369. The courses were deflected from the true meridian as determined by direct solar observations. The distances were measured with 5 foot and 300 ft. steel tapes.

Report.

The cor. of secs. 1 and 12, T 18 N., R 43 E., M. D. B. and M.; on the east bdy. of the tp., is a limestone, 7×10 ins. by 8 ins. above ground, firmly set in the ground, chiseled with 1 notch on the N. and 5 notches on the S. corner, and with a md. of stone W. of cor.

The cor. of secs. 6 and 7, T 18 N., R 44 E., M. D. B. and M., on the West bdy. of the tp.; is a limestone 7×8 ins. by 9 ins. above ground. Chiseled with 1 notch on the N. and 5 notches on the S. corner, and with a md. of stone E. of cor.

These are the nearest standing corners of the public surveys that can be found and identified.

The lode line of each location of this claim was run directly upon the ground, and the several corners established by means of offsets from the
