Fractional T. 29 S., R. 62 E.

	chains	There is no final test of the solar attachment to be recorded. The bearings of the lines in this township were checked by deflection from the line of the California-Nevada State Boundary, or from other lines whose bearings were so checked.
		The land in the resurveyed portion of fractional T.29 S., R.62 E., is rolling, cut by washes. The general drainage is SE. The soil is sandy, gravelly and rocky, over clay-loam, generally about 3d rate. There is no timber. The undergrowth is scattering and consists of yucca, cactus and sage. The joshua grows to the proportion of trees, and in some places is quite heavy. There is no surface water in the township. A pipe line thru sec. 31, bears NE. to the Rex Bell Ranch and SW. to Malpais Spring, in California. There is a corral belonging to the Bell ranch outfit in the NW¼ NW¼ of sec. 31; this corral is on the pipe line which is tapped here for a watering trough.
