~~an~~ ~~mound of earth, 4 ft. base, around post to top.~~

From this point the stan. cor. of secs. 31 and 32, bears S. $89^{\circ}56'E.$ , 4.36 chs. dist.; hereinbefore described.

Land, Level and rolling valley.

Soil, sandy loam, 1st and 2d rate.

Undergrowth, sage and creosote and mesquite brush.

At a point on the N. bdy. of sec. 6, (6th Stan. Par. S. S. bdy. sec. 31, T.24 S., R.57 E.) determined by single proportion bet. the NE. and NW. clos. cors. of sec. 6.

Set an iron post 3 ft. long 1 in. diam., 27 ins. in the ground, with a quart beer bottle deposited at the base, for  $\frac{1}{4}$  sec. cor. sec. 6, with brass cap mkd.

~~thus~~ ~~sec. 6~~ ~~1932~~ ~~dig~~ ~~a~~ ~~circular~~

~~thus~~ ~~sec. 6~~ ~~1932~~ ~~dig~~ ~~a~~ ~~circular~~  
trench 4 ft. diam. and pile the dirt around post to top.

From this point the stan.  $\frac{1}{4}$  sec. cor. sec. 31 bears S. $89^{\circ}56'E.$ , 4.26 chs. dist.; hereinbefore described.

There is no final test of the solar attachment to be recorded. The bearings of all lines in this township were determined, or checked, by deflection from the line of the California-Nevada State Boundary.

The land in the resurveyed portion of T.25 S., R.57 E., is level valley or nearly level desert washland. There are some low sand hills or dunes in the valley portion.

The soil in the valley is a sandy loam of 1st and 2d rate; that of the desert washland is gravelly, 3d rate; and rocky, 4th rate.

The undergrowth is scattering and consists of sagebrush, creosote brush and a little mesquite brush.

There is no evidence of mineral activity in the township.

There is no surface water in the township; but there are several wells from which a fine grade of water is secured.
