

Resurvey of a Portion of the Subdivisions
of
T. 23 S., R. 55 E.

At a point on the California-Nevada State Boundary which is west, by calculation, of the $\frac{1}{4}$ sec. cor. secs. 35 and 36.

Set an iron post 3 ft. long, 1 in. diam., 24 ins. in the ground, for $\frac{1}{4}$ sec. cor. sec. 35, with brass cap mkd.

CAL $\frac{1}{4}$ S 35

1934 dig a circular

trench 6 ft. diam., and pile the dirt around post to top.

From this point the $2\frac{1}{2}$ mile cor. bet. monuments 116 and 117 on the state boundary bears N.46°12'W., 3.27 chs. dist.; described in the field notes of the Portion of the California-Nevada State Boundary resurveyed under this group.

At a point on the California-Nevada State Boundary which is south, by calculation, of the $\frac{1}{4}$ sec. cor. secs. 26 and 35.

Set an iron post 3 ft. long 1 in. diam., 27 ins in the ground, for $\frac{1}{4}$ sec. cor. sec. 35, with brass cap mkd.

$\frac{1}{4}$ S 35

CAL
1934

dig a circular

trench 6 ft. diam., and pile the dirt around post to top.

From this point the $2\frac{1}{2}$ mile cor. bet. monuments 116 and 117 on the state boundary bears N.46°12'W., 6.50 chs. dist.; described in the field notes of the Portion of the California-Nevada State Boundary resurveyed under this group.

There is no final test of the solar attachment to be recorded. The bearings of all lines in this township were determined, or checked, by deflection from the line of the California-Nevada State Boundary.

GENERAL DESCRIPTION

Most of the land in the resurveyed portion of T. 23 S., R. 55 E., is level or nearly level. A range of low hills, which is the divide bet. Pahrump and Mesquite valleys, bears NW. and SE., thru the SE. portion of the township.

The drainage is southwesterly, toward Pahrump valley in the northern and toward Mesquite valley in the southern portion of the township.

The soil is generally sandy with a loam subsoil, about 2nd rate, Parts of this is covered by gravel and even rocks in the hilly portion of the township. In the northwest portion of the Tp. there are scattered sand hummocks.

There is no evidence of mineral activity in the township.

Stump Springs, probably in sec. 5, is the only water in the township, and its neighborhood shows the only evidence of past habitation in the township.

There are several old roads in the township, but none of these appear to have had any recent use
