S6	$\frac{1}{4}$	S5								
	1934									
63.00	A road, bears NW. and SE.									
90.39	The cor. of secs. 5, 6, 7 and 8. Land, nearly level desert. Soil, sandy clayloam, 2nd and 3rd rate. Undergrowth, creosote, sage, shadscale, scrub mesquite.									
<hr/>										
There is no final test of the solar attachment to be recorded. The bearings of all lines in this township were determined, or checked, by deflection from the line of the California-Nevada State Boundary.										
<hr/>										
<u>GENERAL DESCRIPTION</u>										
Most of the land in T. 22S., R. 54 E., is level or nearly level. A very low range of hills bears NW. and SE. thru the center of the township, and portions of the township are also cut by washes of varying depth and width.										
The drainage is all southwesterly, toward the bottom of Pahrump Valley; this township being part of the northwest side of same.										
The soil is mostly sandy, with a clayloam subsoil. The hills are gravelly and sandy, with scattering small rocks. There are scattering sand dunes in the NW $\frac{1}{4}$ of the township and these dunes are covered with scrub mesquite.										

GENERAL DESCRIPTION

Most of the land in T.22S., R.54 E., is level or nearly level. A very low range of hills bears NW. and SE. thru the center of the township, and portions of the township are also cut by washes of varying depth and width.

The drainage is all southwesterly, toward the bottom of Pahrump Valley; this township being part of the northwest side of same.

The soil is mostly sandy, with a clayloam subsoil. The hills are gravelly and sandy, with scattering small rocks. There are scattering sand dunes in the NW $\frac{1}{4}$ of the township and these dunes are covered with scrub mesquite.
