

Chains

NOTE: In order to establish the boundaries of the Reservation it is first necessary to retrace the section lines closing on same to ascertain the location of old closing cors., if they exist, and reestablish the missing ones as near as possible to their original positions.

In order to verify the position of corners adjacent to the Reservation, I go to the cor. of secs. 2, 3, 34 and 35, on line bet. Tps. 14 and 15 S., R. 66 E. This cor. is a sandstone 12x8x6 ins., set in middle of mound of earth and stone 3 ft. base, $2\frac{1}{2}$ ft. high, mkd. 4 notches on the W.; no markings discernible on E. face. The mound is overgrown with grass and sage brush, and there is no doubt but what this is the original cor. This cor. is near the edge of Moapa River bottom.

September 23, 1912, at 10h., a.m., l.m.t., I set off $36^{\circ} 41'$ on the latitude arc, $0^{\circ} 5'$ S. on the declination arc, and determine a meridian with the solar at the above sec. cor.

Thence I run

S. $89^{\circ} 57'$ W. on a random line bet. secs. 3 and 34.

39.65 Fall 28 lks. S. of the $\frac{1}{4}$ sec. cor. bet. secs. 3 and 34, which is a granite stone 14x8x6 ins., marked $\frac{1}{4}$ on N. face, set in middle of mound of stone $2\frac{1}{2}$ ft. base, $1\frac{1}{2}$ ft. high.

Returning to the cor. of secs. 2, 3, 34 and 35,

Thence I run

N. $89^{\circ} 39'$ W. on a true line bet. secs. 3 and 34,

Over level bottom.

1.00 Leave bottom land, brs. N. and S.; enter choppy, broken land.

10.35 Road brs. N. 35° E. and S. 35° W.

12.40 Draw, drains S. 70° E.

32.65 Draw, drains S.
