 greasewood and sage brush

May 23^d 1868
General Description

The entire portion of this Township
 is suitable for agricultural purposes, having
 a light rich deep sandy soil, it is capable
 of producing all kinds of grain and
 vegetables, The rank growth of sagebrush
 and greasewood is abundant Evidence of a
 productive soil, The bottom lands on
 Humboldt river and at the mouth of Santa
 Rosa Creek make fine meadows, The
 Humboldt river which flows through
 the Northern portion of the Township is
 a crooked sluggish stream, The river
