

General Description

Most of the Southern and Eastern portion of this township is level or slightly rolling and covered with Sage brush, Grease wood and bunch grass. The soil is fair, and suitable for raising grain, and should therefore be subdivided.

The balance of the Township is mountainous and destitute of timber or Mineral.

Note - The land in Township 42 North, Range 64 E, is mountainous unfit for cultivation and destitute of timber or Mineral, and the boundary lines impossible to measure on account of high rocky and precipitous mountains.
