 dig pits and raise mound of earth
 as per instructions for closing
 corner betws 3 and 6
 gravelly W. slope - soil 2^d pot
 white sage - and bunchgrass
 Nov 27 - 1870.

The North Western and Western
 portions of this Township are
 similar to the East Township
 in soil and productions. Kern
 Creek is a fine stream and affords
 abundance of water for irrigation.
 There is considerable settlement
 along the creek and excellent
 crops were raised the past
 season - The eastern portion
