

62
T 273 N. R 20 E. M. D. M

General Description

The subdivided portion of this township is mostly level or slightly rolling and is covered with Sage brush-greasewood and scattering rye-grass. The soil is fair and suitable for cultivation and capable of producing a fair crop of grain. As yet there is but one settler in the township, in the S E $\frac{1}{4}$ of Sec 11.

The unsubdivided portion is hilly and unfit for cultivation, with but little timber and no mineral
