

6
Sixth Standard Parallel North, in Range 46 East

8

General Description

The Sixth Standard Parallel North, running East from the Co. to Townships 31 North, Ranges 45 and 46 East. Passes over the gentle N slope of mountain base, with good soil, suitable for raising grain or for grazing purposes, until it reaches a point about 60 chains E. of the Corner to Secs. 33 and 34 - thence, to the Corner to Tps 31 N - R 46 and 47 East - it passes over hilly and mountainous land with soil mostly poor and unfit for cultivation.

The whole line runs over land covered with Sage brush. and scattering bunch grass and some White Sage -

The line if extended further East will pass over high rough mountains, with but little timber and no mines opened.
