

T 10 N - R 43 E.

General Description

The land in this township is mostly nearly level and covered with Sage Bush, Greasewood, Bunch grass and White Sage. The soil is fair and the greater part suitable for cultivation and all good grazing land.

There is now one settler in the North Western part of the township.

The whole township being arable or grazing land, it should therefore be subdivided.

This township is a part of Smoky Valley.
