

Survey made with Burt's Patent Improved Solar
Compass, nearly new, and in first rate order. Made
by *Thos. E. Buckley* of Troy
N. Y. in 1881.

The instrument that I used in
making this survey, was carefully
examined and compared
with the meridian at Virginia City
on April 25th 1881. On the 6th of May
I set my instrument at the Co. to
Hrs. 13 & 14 S. R.S. 67 & 68 E. at noon,
and carefully compared it
in all the adjustments and found
them correct. I took the
latitude and found it to
be $36^{\circ} 45' N.$ and proceed
to run as follows:—
