

The instrument that I used in making this Survey, was made in Troy, N. Y. in 1881, by W. and L. E. Gurley.

On the 10th day of June, 1882, I set my instrument at the Standard Cor. to Tps. 20 S., Ro. 63 and 64 E., and carefully examined it in all its adjustments, and found them correct. I took the latitude and found it to be $36^{\circ} 9'$ North and proceed to run as follows:
