

Township 41 North

189

139

Range 44 East

M. D.

Meridian.

(See page 101).

General Description.

The southern part of the township is rolling mountains, covered with excellent bunch grass; the soil being generally 2d rate.

The northern part is slightly rolling with sage and grass; the soil being also 2d rate.

The bottom lands along the Little Humboldt are 1st rate alluvial soil - They are all under fence and cultivation in grain & hay.

There are two settlers in the river bottom.

The township should be subdivided.
