

T39N R68E M. D. M.

General Description

The Western portion of this Township is mountainous fairly well wooded an abundance of wild grasses

A stream of water runs through Secs. 7 + 8 and a portion of 9 then strikes

The eastern portion is a rolling mesa covered with sage brush some wild grasses but no water. Soil a sandy loam. no timber

In several instances it was impossible to set rock corners in the ground to the depths required in the manual without blasting in all such cases the rocks were set down to bed-rock and tamped
