

158

Subdivision T38 N. R 386 - Contin^d

Mount Diablo Meridian

General Description

The W. tier of Secs in this Tp is in rough Mountains and is well watered.

The rest of the Tp is partly rolling partly level ground rather sandy and covered in many places with heavy sage brush.

There is no timber of any importance excepting a few aspen trees in some of the Cañons.

Several abandoned cabins were found and in garden-cañon there is a house with barn and corral where a Chinaman lives and raises vegetables in the cultivated field.

I found the old corners on the S. bdy of the Tp and on part of the N. bdy but a portion of the North bdy and the W. bdy had to be re-surveyed.
