

- General Description -

The lines which were retraced in this T^p. were necessary for me to begin & close my work.

The portion which I have sub-divided consists of rough mountains on the two West tiers of sees.

The other two tiers are in level & rolling ground.

There is plenty of water in the mountains & they are well covered with bunch grass, making the country valuable for stock & grazing purposes.

The remaining portion is covered with sage brush & in some places with sand.

There is no timber except Aspen & a small undergrowth in the cañons.
