On the night of Sept 24th 1888 I took an observation on the Star Polaris in accordance with instructions contained in the Manual of Survey and drove pickets on the line thus established.

Survey commenced Sept 25th 1888 with a Baily's solar instrument and properly tested Steel chain

Before commencing this survey I test my compass on the line established last night and find it correct

I begin at the Standard bar to T 36 N range 34 & 35 E already described by me
