Township 37 North Range 37 East

Mount Diablo Meridian.

Preliminary to commencing this survey I ran west on a blank line on the south boundary of Sec 36 and at 39.98 chs found the $\frac{1}{4}$ Sec cor. and at 79.99 chs found the Sec cor. As the East boundary has just been run it was not run.

My compass will therefore run the same line as the Exterior boundaries and the chaining practically agrees.

Survey commenced July 28th 1888 with a Gurley's improved solar compass and steel chain properly tested.

I commence at the cor to Secs 1. 2. 35 and 36 on the south boundary of the township already described by me

Thence I run
