

GENERAL DESCRIPTION.

The most of this Twp. is situated in the North end of the Eugene Mts. & the S.E. $\frac{1}{4}$ of the Twp. may be considered mineral land. There are some Springs in the S.W. portion & some scrub cedar trees ^{in mts} good only for wood. Some Willows along banks of Cañon where water flows in Spring time of each year.

The north tier of secs. is covered with a dense growth of Sage, greasewood & heavy sand.
