

GENERAL DESCRIPTION.

In surveying this Township it was necessary to retrace the old work the old corners being almost entirely obliterated.

I destroyed all old posts &c when found.

This township contains no agricultural land with the exception of that in Maggio Creek flat in Secs. 30, 31, & 32, & possibly some in the Dry Valley in the eastern portion, but this latter is too remote from any water supply to have much tillable value.

The only stream in the Township is Maggio Creek in the lower S. W. Cor. and there is one small spring in Sec. 6.

The whole Township affords excellent grazing.

All posts used are of redwood.
