

East Boundary S. 17. N. R. 50 E.

At 8.30 a. m. June 12th 1893 I find by observation on the stake set by me last night at the S. E. cor of Sps 17 N. R. 50 E the variation to be $16^{\circ}40' E$

From the cor to Sps 16 & 17 N. Rs 50 & 51 E I run N. bet Secs. 31 & 36 with $\text{Va. } 16^{\circ}40' E$ and at 40.20 find the mound & pits of the old $\frac{1}{4}$ sec. cor to be 5 links E and at 81 chs find the sec. cor which is a post in mound of earth to be 10 links E. I therefore continue on the blank line and find the old line correct as to alignment but incorrect as to distance & course. At 6 miles 8 chs & 89 links I find the corner to townships 17 & 18 North Range 50 & 51 East to be 50 links east. As S. 17 N. R. 51 E. has not been subdivided and consequently no subdivision lines have been closed on this East boundary I resurvey the same as follows:
