

South Boundary

At 7:15 am. on June 13th 1898 I find by observation on the line run by me for the east boundary of S. 17. N. R. 50 E the magnetic Variation to $46^{\circ}40'$.

From the cor to Sps 16 & 17. N. R. 50 & 51 E I run $S 89^{\circ}53' W$ on a blank line between Sects. 14 & 36 with $16^{\circ}40' E$ and at 4080 find the sec cor to be S. 18 links and at 8038 find the sec cor to be S. 30 links I continue therefore on the line and find that no portion of this line is correct either in alignment or distances with several corners much dilapidated, but at 5 miles 74 chs and 36 links find the cor to Sps 16 & 17 N. R. 49 & 50 E to be 42 links South.

As S. 16 N. R. 50 E has not been subdivided & consequently no subdivision lines have been added on this south boundary I therefore re survey the same as follows:
