

South Boundary

S. 23 N. R. 52 E. Oct. 7th 1893

From the S. Cor S 23 N. R 52 E
I run E on random line as per
instructions with a var $16^{\circ} 43' E$
Went 5 miles after diligent search
was unable to find the cor to Secs
1, 2, 30 & 36. I then run 76.19 chs
further E. to agree with my closure
on the range line bet R. 51 & 52 E.
As not being able to find any cor.
I ran North as the topography
of the country convinced me I was
too far South. At 79 chs the
cor. to Secs 30 & 36 on S line
S 23 N R 52 E. bears West 31.19 chs
this is a pine post set in a mound
of earth properly marked and
witnessed, in order to make sure
that this is the proper cor I retrace
the S. boundary Sec 36 & at 140
chs I find stake set in mound
of earth. For 1/4 Sec cor. properly
marked and witnessed. At 100 chs
I find stake set in mound of earth
for Cor to 1/4 properly marked
and witnessed. I and level these
sage brush & grease wood
I also retraced the West line
