

5th Standard Parallel
R 30 E

At 8 a. on January 4th 1894 I find
the line established by me Dec. 1890 <sup>when taking an observation on Polaris under
contract No. 196</sup> bears
N 17° 35' W and the variation is
17° 35' East at this time.

In subdividing this township I
commence by running West on a
blank line on the south boundary
of section 36 and at 40 & 80 chs
am unable to find any trace of
old corners, I therefore continue the
true line West & find that many
of the corners are nearly obliterated
and out of alignment but that
the corner to Tps. 26 N. Rs. 29 &
30 E is 6 miles 78 links West and
84 links North of the starting cor.
As township 26 N. Range 30 E
has not been subdivided and
