

In subdividing this township I am unable to find the necessary corners upon which to close my work on the west boundary & therefore reservey the same as follows.

Commencing at the closing corner to Tps. 25 & R. 29 & 30 E I find the variation of the needle by observation on the 5<sup>th</sup> Standard Parallel to be  $17^{\circ}35'E$ .

The notes of the former survey as supplied by the Surveyor General show that the line was run with a variation of  $17^{\circ}E$ .

I therefore run  $S. 0^{\circ}35' W$ .
