

General Description

I find the S. four miles of the West boundary and the South boundary to run over high rough mountains which accounts for the closure of my rancho on the S. side.

The South half & west tier of sections are mountains and afford good grazing while the remainder would make good agricultural land with irrigation.

This township is watered by springs in secs. 35, 16 & 20 and by the natural rainfall.

There is no timber.

All posts used are of redwood.
