

North Boundary

From the Cor common to $\frac{1}{2}$ Sec
 43.344 N. R. 25.5456 E. I run
 West on random line. Setting
 Temporary corners at each 40
 and 80 chs.

at 3 miles and 60 chs I make
 diligent search for old cor. but
 could find no trace of cor. &
 therefore continue W.

At 4 miles I find no Cor. I
 continue West and at 5 miles
 and 77.40 ^{ch} links I intersect the
 West line of $\frac{1}{2}$ Sec at a point 1 ch
 & 5 lks S of $\frac{1}{2}$ Sec Cor which is
 a large granite rock, ^{properly marked} firmly set
 in masses of rock on a rocky
 butte. no pits. The correction
 for this line will be $\frac{1}{2}$ lks W
~~per mile~~ and 18 links S. answering
 to a course of $589^{\circ}52' E$.
