

S. 36th - Twp. 203

5-

Township 36 N. Range 23 E

Mer. 29, Meridian.

Nov. 15 - 1894

Preliminary to commencing the subdivisions of this township, I go to the 9th Twp. cor. to sec. 35-36 which is a basalt stone stone firmly set and marked as described by the surveyor general

Thence from E. on blank line on 9th body of sec. 36

at 40.01 I find evidence of old mound and pits

but no signs of frost,

at 80.00 I find no evidence of cor. leave a flag.

This point comes on the bottom land which has been badly channeled and covered with drift brush & caused by water-sprout.
