

## South bdy of T. 30 N R 52 E.

In order to find the South boundary  
I retrace the line south from this  
point and at 40 + 80<sup>+</sup> find old cns  
as described but am unable after  
diligent search to find any corner  
on the South boundary.

I retrace from this point E but can  
find no corners.

I then retrace W. with the same result  
but at 160 chs find the corner to  
Secs. 5, 6, 31 & 32 which is a cedar post  
firmly set & properly marked & witnessed  
agreeing with field notes supplied by  
the Surveyor General.

It is evident that no corners now exist  
East of this point on the South bdy  
which I therefore re-survey.
