

Subdivisions of General Description

All of this township is mountainous and is well watered by springs & small creeks which with considerable growth of bunchgrass makes it a first class grazing range.

Elliott has a small cultivated field in Sec 13 and there is an enclosed mountain pasture in Secs 1 & 2.

The only timber in the township is a small bunch of mountain arahogany in Secs 3 & 10.

In some cases I found it impossible without blasting to set rocks to depths required in the manual but all were set firmly in the ground to bedrock & beyond possibility of accidental removal.
