T. 32 N. R. 54 E.

General Description

Except a small portion in the S. E. cor. all of this township is mountainous, & affords good grazing. It is watered by Dixie Creek along which in Secs. 34, 35 & 26 are some enclosures & cultivated land.

There is in places a growth of scrub junipers of no value so far as fuel & too stunted & bushy to be available either for fire or bearing trees.
