

General Description

This township covers the head waters of Mason & Beaver Creeks and is generally mountainous with some agricultural land in the bottoms and on the lower slopes on the East side.

What is known as the Co-op field, a meadow held by Jas Lydiard is situated in Sec. 1.

There is no timber in the township. In some cases I was not able to set rocks to the full depth required in the manual but in such instances they were set firmly in the ground beyond chance of accidental disturbance.
